ECOMMERCE POWERED BY FOOTWAY+

For information about the services see
PDF Footway OaaS Terms of Service

Calculate your price in three easy steps!

1. STORAGE

Calculated per stored product and day according to the pricelist on page 2

2. ORDER

Calculated per delivered product. Save costs with more items per order! 25% discount on the second product and 50% discount on 3 or more.

3. RETURNS

Calculated based on returned products using the same price list as for standard handling. Return handling from return shipping, customer support to storage.

SERVICES AND PRICES

For information about the services see PDF Footway OaaS Terms of Service

- ① **Storage** Price for storage is charged based on the number of products, its weight, maximum of volume weight, and the number of days stored. See table 1
- ② **Order & Returns** The price for orders and returns is calculated per product and its weight and to which country it is sent according to price list 2. If an order contains 2 products, the price is 25% discounted for the lightest product. For three products or more, the price is discounted by 50%.
- ③ **Express order** Same service as above but with express shipping. See table 3.
- ④ **MSC-fee** When using the Multi Sales Channel (MSC), the person who sells to the End Customer pays 10% of the sales price to the End Customer. The fee is credited upon any return.
- ⑤ **MSC Commission** Commission of 5% of the End Customer Price is paid to the party that stocks products and allows other Users to sell their Products to the End Customer. E.g: A product supplier that lets other merchants sell the products or an e-merchant that lets other stores also sell its products. Paid commission is debited in the event of a return.
- ⑥ **Minimum fee** Minimum debit per active account is SEK 199/month
- ⑦ **License fee** Monthly fee for the platform. Calculated at 1.00% of the store's sales to the End customers including VAT.
- ⑧ **Payment terms** Invoicing takes place weekly with payment terms 15 days from the invoice date. All prices are excluding VAT.
- ⑨ **Weight calculation** Volumetric weight for shipping is calculated as; length (m) x width (m) x height (m) x 280. This gives a weight based on size. If the volumetric weight is higher than the actual weight of the package in kg, the volumetric weight is used as the weight. This method ensures a fair price for large, lightweight items that take up significant space in storage and transportation.

① STORAGE

Unit	Pallet	Item	Item	Item	Item	Item	Item	Item	Item	Item	Item	Item
WEIGHT (g)		150	250	500	1 000	1 500	2 000	3 000	5 000	7 500	10 000	20 000
